

As the last days of summer wind down, students are both sad for summer to end and filled with the anticipation of seeing their classmates from their community they may have one to school with for years. While many of us were vacationing, the Fairfax County School Board started making plans that will drastically change the fabric of our community schools.

The new policy is based on the County's "One Fairfax" policy that expressly aims to create equity throughout all of Fairfax County's 1.2 million residents by breaking up what Fairfax politicians call "islands of excellence" within its 400 square mile boundaries."

One parent I spoke with said, "We used to walk our kids to school together starting in Kindergarten. They are all still close friends. Now our kids are entering high school. I really look forward to watching them play sports together and seeing all the families we have known for years. Our community is a big family. I don't want my child sent somewhere across the county away from the kids we have grown up with."

As a naturalized citizen from Mexico, I am not in favor making huge changes to the schools that students currently attend, busing students to different neighbors and separating students from the community of students and families that have supported them throughout their education.

Please help me to stop boundaries changes, vote for me on November 5th. I'm looking forward to talk with you, call me (703)880-4100

EVENTS

RSVP is recommended but not necessary
info@vote4laura.com Q&A 202 250-0887
